## 1. Thank You!

In this place we want to say thank you to everybody that is/was somehow involved in this project. Even if you did not end up here, whether it was just a few comments, criticism, some good ideas, patience, software to build on or build with, or lines of code, you have all taken part in making this project a working reality.

Below you can find a list of people which have significantly contributed to the project by working long and hard to make quality software for the rest of the world to use.
